

Darcy's Top 10 Experience

Brandon was a delight to work with. He's a hard worker and pulls his own weight when it comes to contributions. Brandon is a self-starter who took the initiative to work on several aspects of the code innovatively and independently. He proposed ideas on how to improve the look of the website, and he found and debugged errors in the responsiveness. It was a pleasure to work with him, and I would be happy to do so again.

Brandon's Responsibilities: responsiveness, and implementation of configured layout template into his own page. He also acquired the image assets for both of us and the video assets for his own page. And while the design itself was a collaborative effort, the figma was primarily handled by Brandon. He even added a mockup for mobile support.

Darcy's Responsibilities: I was responsible for bringing the vision to life when it came to website flow. I created the collage-style layout template and within the code ensured that, when made responsive, everything would collapse in accordance to the figma. I procured reviews for my specific song choices and incorporated the image assets found by Brandon. I also handled a majority of the CSS styling (the customCardTextBox class was Brandon's contribution).
